OMAR VILLANUEVA
Full-stack Developer

Fluent in PHP, Java and SQL
*Native in **Javascript**.*

PROFILE

I am a fluid **communicator** with a **positive** personality.
I can easily **explain** programming concepts to clients and junior developers; as well as **lead** and **manage** teams **in-house** and **remotely**.

EXPERTISE

I am looking for a position that requires advanced frontend skills and in-depth knowledge of **Javascript ES6**+. I can create outstanding **SASS** designs and animations; develop and maintain full-stack websites using **React**, **Vue** or **Angular**; make iOS and Android apps with **React Native**; optimize existing sites with Service Workers (**PWA**); create and consume **GraphQL** APIs, and even transition monolithic sites to a **Server-less** architecture (**JAMstack**).

EXPERIENCE

Intermediate Web Developer @Arcane
Feb 2020 – Present

- Maintain and update the web products of our renown clients.
- Create SCSS and JS animations for modals and menus.
- Transform PHP sites into dynamic JS web applications.
- Implement Service Workers into our current stack.
- Learning and troubleshooting existing code bases with ease.

Frontend Developer @Mobility Quotient
Apr 2019 – Jan 2020

- Worked with various tech stacks in the backend and frontend.
- Quickly switched between PHP and Vanilla JS in a daily basis.
- Created custom components in Vue and Angular.
- Customized testing cycles for React Native applications.
- Updated and maintained Symfony and WordPress sites.

Full-stack Developer @DigitalVilla.ca
Jul 2016 – Present

- In 2014 I began freelancing on the side as a graphic designer.
- To increase my client's revenue, I taught myself to program.
- By the summer of 2016 I had web development as my main service and soon after I resigned from my marketing job and became a full-time freelancer.

Digital Marketing Consultant @044 Social
May 2016 – Nov 2016

- Elaborate marketing strategies with prospective clients.
- Deliver the most ROI through new websites, media design and social media campaigns.
- When I saw the damage that a poorly designed website does to a brand or small business, I decided to pursue Web development as a full-time career.

EDUCATION

Web Engineering @E-learning
May 2017 – Present

- I am in the business of solving problems and offering innovating solutions. What I do for my clients truly impacts their businesses.
- Therefore, I take my craft seriously and by constantly learning, and exploring new technologies I create only top-quality products.
- My subscriptions to platforms such as Frontend Masters, Lynda and Udemy, showcase my commitment to such excellence.

Software Development @SAIT
Sep 2017 – Apr 2019

- To move my freelance career further. I took advice from the best in Silicon Valley and enrolled in core OOP programming and master core skills rather than learn the hottest framework.
- Learning big O notation, trees, graphs, data algorithms, Unix and OS programming have turned me into a **software engineer** that can easily pick up any framework and understand what it does under the hood.
